1 What tire technicians do

Tire technicians mount, balance, rotate and repair tires, check pressures and wear, and often do basic services such as batteries and wiper blades.

2 Skills and safety

Employers look for careful work with lifts, tire machines and torque tools. Correct lug nut torque and wheel safety matter on every job.

3 Licensing

We found no New York license for tire technicians. The DMV's repair shop rules exclude businesses whose work is only changing tires and similar simple services, but repair shops that register still use tire technicians.
